

## **YOUR CAREER STARTS HERE !**

### JOIN OUR TEAM AS A SOFTWARE INTERNSHIP FOR COMMERCIAL VEHICLES

Vehicle Network and Information - Commercial Vehicles and Services (VNI CVS) business unit is the leading Software Development location world-wide in the area of Commercial Vehicles.

With a customer portfolio consisting of all major European and International OEMs, the Timisoara Enhanced Driving & Sensorics department is developing the future VNI CVS technologies in the area of Intelligent Preview Functions, Telematic Control Units (incl. IoT and V2X over 5G and High-Performance Computing) and Radar Sensors application software.

We are looking for a young and enthusiastic student, interested to learn and grow in a professional software development environment.

#### **Requirements**

- › Object oriented programming language (C++ preferred)
- › Linux OS basic know-how
- › Microcontroller basic know-how

Are you excited about the opportunities we will offer you while we redefine the future mobility together? Then join us and “Let Your Ideas Shape The Future”.
